## 74% REPAYMENT RATE

## Poor good payers, says DSWD

By Volt Contreras

THE DEPARTMENT of Social Welfare and Development yesterday sought to dispel a common perception that the poor are a "credit risk," saying they have satisfactorily paid back livelihood assistance loans which the agency had lent out over the last decade.

The DSWD reported a 74-percent repayment of the close to P3 billion in loans it had granted to indigent households since 1992.

The agency gave the figures just as it was preparing to implement a loan

compass and debt relief program for the poor in Metro Manila and eight other provinces next month. This means scaling selective zones with fresh loan packages for the beneficiaries.

A total of P977,594,427 capital assistance has been released under the department's Self-Employment Assistance-Kamayan (SEA-K) program. Of this amount, P642,362,598 has been repaid, it said.

"Contrary to popular notion that the poor are a credit risk because they totally do not pay loans, (this) proves that the poor do pay and are capable of handling

loans," the DSWD said in a statement.

The SEA-K program organizes residents in the poorest communities, trains them on business management and livelihood skills, then grants them a no-collateral, no-interest loan with which they can start a small venture.

Beside loan paying the original loan amount, the group is also required to set aside a portion of their profit as savings, or what they call capital buildup.

As of June of this year, a total of 11,223 SEA-K associations have been organized, benefiting about 291,068 families nationwide.

## RP asks HK to extradite drug lord

THE PHILIPPINES has formally asked Hong Kong to extradite suspected Cebu drug lord Calvin de Jesus Tan, Justice Secretary Raul Gonzales said yesterday.

Gonzales said the Department of Justice sent the extradition request to the Hong Kong Ministry of Justice on Wednesday.

"The Hong Kong authorities are already preparing to have warrants issued against (Tan) for his involvement in the preparation for his extradition," Gonzales said.

Tan is believed to be the financier of the Cebu drug laboratories where P1.5 billion worth of drugs was found last month. He was arrested in Hong Kong on Oct. 3 with \$831,000 in cash as well as a small arsenal of drugs and cocaine. **Philip C. Salinas**

# Drugstores group says doctors should specify generic drugs

By Rina de la Cruz

Doctors should be urged to specify generic medicines.

The Drugstore Association of the Philippines, headed by the owners of the country's largest retail drugstore chain, has urged doctors to specify generic medicines instead of brand names when prescribing drugs.

The association says that if a doctor prescribes a brand name drug, the pharmacist will usually dispense the most expensive version of the drug, even if a cheaper generic version is available.

"Doctors need to be informed about the generic list of only the drugs that are available," he said. "They are the ones who prescribe them."

Dr. Rina de la Cruz said.

The Department of Health has issued an administrative order requiring that the Drugstore Association be notified by the end of the year of all generic drugs that are available in the country.

"All manufacturers, through their respective associations, shall bear full financial and responsibility in determining whether, including the generic alternatives, is the preferred solution to medicines with the assistance of the University of the Philippines and other institutions," he said.

The generic list will be made available by the end of the year to all hospitals and other medical institutions. The association's board of directors will also be asked to submit a list of patients who are prescribed generic drugs.

The association has already been working on a list of generic drugs and has been successful in getting some of them included in the national list. It has also been successful in getting some of them included in the national list.

"We are not going to give up," he said. "We are going to continue to work on it until we have a complete list of generic drugs that are available in the country."

"We will be doing more than that. We will be doing more than that. We will be doing more than that."

## 100,000 Iraqis seen having died from war

Public health officials in Iraq have estimated that at least 100,000 Iraqis have died from war-related violence, according to a report to be published in a study by the British medical journal *Lancet*.

The study, which is the first to provide a comprehensive estimate of the number of Iraqis who have died from war-related violence, was published in the *Lancet* on Wednesday. It was based on data collected from a survey of 10,000 households in Iraq, conducted by a team of British and Iraqi researchers.

The study found that the number of deaths from war-related violence in Iraq has increased significantly since the start of the conflict in 2003. The researchers estimated that at least 100,000 Iraqis have died from war-related violence since 2003, with the majority of deaths occurring in the last two years of the study.

The study also found that the number of deaths from war-related violence in Iraq has increased significantly since the start of the conflict in 2003. The researchers estimated that at least 100,000 Iraqis have died from war-related violence since 2003, with the majority of deaths occurring in the last two years of the study.

The study also found that the number of deaths from war-related violence in Iraq has increased significantly since the start of the conflict in 2003. ## Nuclear watchdog insists Iraq explosives taken after US invasion

PARIS — The International Atomic Energy Agency (IAEA) has insisted that Iraq's nuclear program was not a threat to international security after the US invasion of Iraq in 2003. The agency's director, Mohamed El-Baradei, said that the IAEA had no evidence to suggest that Iraq's nuclear program was a threat to international security.

# House may transfer part of P9-B DAR fund to agri department

By Christopher S. Reynolds

House of Representatives members are expected to vote on a bill that would transfer a portion of the P9-B Disaster Assistance Fund (DAR) to the Department of Agriculture. The bill, known as the Agricultural Disaster Assistance Act, would allow the Department of Agriculture to use the funds to provide disaster relief to farmers and ranchers. The bill is expected to pass in the House, but it still needs to be approved by the Senate. The Department of Agriculture has been requesting additional funding for disaster relief for several years, and this bill would provide a significant source of funds. The bill is expected to be introduced in the House in the coming weeks. ## Globe unit up for relaunch after sluggish performance

By Christopher S. Reynolds

Globe.com, a leading online news and information provider, is planning to relaunch its website after a period of sluggish performance. The company, which is a subsidiary of the News Corporation, has been struggling to attract new users and generate revenue. The relaunch is expected to include a new design, improved navigation, and a focus on providing more relevant and timely news. The company is also planning to launch a new mobile app to reach users on their smartphones and tablets. The relaunch is expected to be completed by the end of the year. The company is confident that the relaunch will result in a significant increase in user engagement and revenue.

Yap proposes online system for FTA deals

Yap proposes an online system for FTA deals. The system would allow businesses to easily find and negotiate trade agreements. The system is expected to be launched in the coming months. The system is expected to be a significant improvement over the current system, which is often cumbersome and difficult to navigate. # Oh no, it's Johnny, Tessa and Anton!

Out where's Mimi?

## Time says

By Billy Lee

**J**ohnny, Tessa and Anton are the three children of the late actor, who died in 1990. They are now 10, 12 and 14 years old. They are all very bright and are all very interested in their father's work.

Johnny is the eldest and is a very bright boy. He is very interested in his father's work and is very keen to learn more about it.

Tessa is the middle child and is a very bright girl. She is very interested in her father's work and is very keen to learn more about it.

Anton is the youngest and is a very bright boy. He is very interested in his father's work and is very keen to learn more about it.

## Michael, looking as good as new

Michael is a very bright boy. He is very interested in his father's work and is very keen to learn more about it.

# What scares you?

Are you a horror fan? Do you like scary movies, books, or games? Do you like to be scared? Do you like to scare others? Do you like to be the scariest person in the room? Do you like to be the scariest person in the room? Do you like to be the scariest person in the room?

## Are you a horror fan?

**T**he word "horror" is a very old word. It comes from the Latin word "horreo", which means "to store" or "to keep". In the 18th century, the word "horror" was used to describe a feeling of fear or dread. Today, it is used to describe a genre of fiction that is designed to scare or horrify the reader.

## Do you like scary movies, books, or games?

There are many different types of horror media. Some people like to read horror books, while others prefer to watch horror movies or play horror games. Each type of media has its own unique appeal. For example, horror books allow the reader to imagine the scary scenes in their own mind, while horror movies provide a visual experience. Horror games, on the other hand, allow the player to experience the fear firsthand.

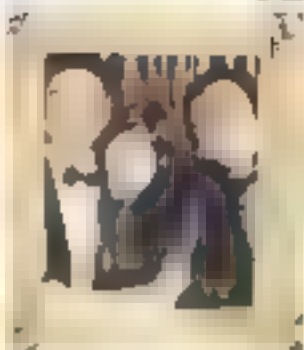

## Do you like to be scared?

For many people, being scared is a thrilling experience. It can be a way to escape from the mundane and experience something new and exciting. Horror media is often designed to provide this experience. By scaring the audience, horror media can create a sense of suspense and tension that is both enjoyable and terrifying.

## The good scary

While horror media is often associated with fear and terror, it can also be a source of entertainment and enjoyment. Many people find horror media to be a fun and exciting way to spend their free time. It can also be a way to explore the darker side of the human psyche and the things that we are afraid of.
